burnery ' demand

# **Commentary:**

There are a number of approaches to the 'Justify' question, and this candidate has chosen to pick one option, and then consider the strengths and weaknesses of this option before arriving at a justified conclusion. Importantly, there is no 'right or wrong' answer with Justify questions; their purpose is to allow candidates to structure an argument that is based in the particular context of the question. In this case, the context is a dessert manufacturer, *Last Course Patisserie*.

The candidate chooses Option 1 - to invest in new machinery. They use appropriate terminology throughout the response, for example, by making the initial point that this will lead to increased productivity. They develop this point through linked strands of development, and also attempt to contextualise the points (context shown by the blue boxes).

The candidate then offers a second paragraph which deals with the disadvantages of Option 1. Once again there is some attempt at contextualisation and some terminology is used. The final paragraph offers a conclusion which weighs up the extent to which Option 1 would be best for *Last Course Patisserie*.

Over the full response the candidate has generated 5 logical linked strands and as a result they secure Level 3 for A03a or 'Analysis'. Evaluation (AO3b) is also provided and is enough to secure Level 3. Application is present but is not quite strong enough for Level 3. The candidate makes some reference to the 'cake business' but there were opportunities to further embed the response in the context of this particular business/market. Level 2 was awarded for AO2. Therefore, the candidate also scores Level 3 for AO3a and AO3b, and Level 2 for AO2. Using the best fit approach this means the **final mark is Level 3 - 8 marks**.

### Justify – Paper 1 - Exemplar 2 (1BS01)

In order to increase the number of desserts that can be produced to meet the extra demand, *Last Course Patisserie* is considering two options:

Option 1: investing in new machinery

Option 2: employing more staff.

(c) Justify which one of these two options Last Course Patisserie should choose.

Th cape Compade. ontio hoor A reason why pastry Option 1 the prod uction would be the proce best option. Devon vore efficient Developed in the 6 uners to the context of the 'pastry without Mare deserts a shorter havingto roduce ti in production business' therefor can business. pastnes a £5 result 1000 satisfallon ustomer will the will benerate 5 6x greets ÷ 4 MXM Cakes therefore -6 prot e be 4. burder Of the morea fixed teen austracers, they will break reach 9 yichay uss th 4 cape become make ma a la babba more guiddy Pt Candidate Re Ho newna ma hiven provides a Jacque ~ple th Swiss Leed the -0 paragraph tivation if ti th considering V) LOCKY Lall et the the drawbacks of OBSM - at ruk of uner royne vero. the chosen option. Use eticieran pro tentra lly could decrease of context -'reference to auer. pastres. ey rite Swiss Head Chef' demand Sitt 76 ndron Conclusion provided and sh. uses an 'it depends' Rtmi cerr 4 approach ne (Jb) and also refers to and. cherency timescale -'in the short ani .c.th passen 0 term'.

### Commentary:

This candidate chooses the same approach as the candidate in Exemplar 1. The candidate chooses Option 1 - to invest in new machinery. They use appropriate terminology throughout the response, for example, by making the initial point that this will lead to increased efficiency for the

(9) 9 Q06

business. They develop this point through linked strands of development, and also attempt to contextualise the points (context shown by the blue boxes).

The candidate then offers a second paragraph which deals with the disadvantages of Option 1. Once again there is some attempt at contextualisation and some terminology is used. The final paragraph offers a conclusion which weighs up the extent to which Option 1 would be best for Last Course Patisserie. The conclusion is balanced by considering the timescale, namely the possible effects in the short term.

Over the full response the candidate has generated 5 logical linked strands and as a result they secure Level 3 for A03a or 'Analysis'. Evaluation (AO3b) is also provided and is enough to secure Level 3. Application is present and is strong enough for Level 3. Therefore, the candidate scores Level 3 for AO2, AO3a and AO3b which means a **final mark of Level 3 - 9 marks**.

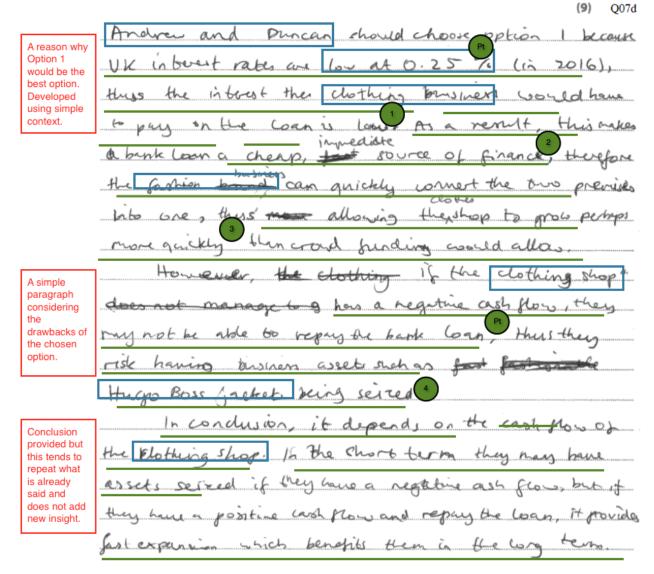

### Justify – Paper 1 - Exemplar 3 (1BS01)

To pay for the conversion of the premises, Aphrodite is considering two options:

Option 1: obtaining a bank loan

Option 2: crowd funding.

(d) Justify which one of these two options Aphrodite should choose.

### **Commentary:**

This response is to Question 7d on Paper 1 and is based on the *Aphrodite* case study. This candidate chooses Option 1 - 'obtaining a bank loan' - as the best method for the business to fund its expansion. They provide some contextualisation by using data from the case study - interest rates being just 0.25% in the UK. From the initial point they provide some valid linked strands of development.

The candidate then offers a second paragraph which deals with the disadvantages of Option 1. There is an attempt at contextualisation, but this is simplistic and does not go far beyond reference to 'clothing shop', although there is a reference to a product *Aphrodite* sells.

Over the full response the candidate has generated 4 logical linked strands and as a result they secure Level 2 for A03a or 'Analysis'. Evaluation (AO3b) is also provided in the form of a final conclusion, but this is at a simple level and cannot proceed beyond Level 2. Application is present throughout the response and was sufficient for Level 2. Therefore, the candidate scores Level 2 for AO2, AO3a and AO3b which means a <u>final mark of Level 2 - 6 marks</u>.

### Justify - Paper 2 - Exemplar 4 (1BS02)

In order to improve the motivation of its shop floor employees, *Sainsbury's* is considering two options:

Option 1: retraining

Option 2: increase wages.

(d) Justify which one of these two options Sainsbury's should choose.

|  | I believe that sains pury's should   |  |  |  |
|--|--------------------------------------|--|--|--|
|  | choose option 2 and This is because  |  |  |  |
|  | 127 yourgestaft Bound you/ utedte    |  |  |  |
|  | blatter l'astopor septe and world    |  |  |  |
| A reason why   | This is because paying statte porte  |  |  |  |
| Option 1 would be<br>the best option.                  | would increase their motivation as   |  |  |  |
| Developed using<br>simple context<br>through reference | they would fell that they are        |  |  |  |
| to Aldi.   | being recognised and would make      |  |  |  |
|  | the job more attractive to future    |  |  |  |
|  | employees Also, it would keep        |  |  |  |
|  | sains bury's competitive as it would |  |  |  |
| The candidate<br>starts dealing with                   | reduce the mage difference with      |  |  |  |
| the benefits to<br>Sainsbury's and is<br>therefore not | Alde" and would + herefore ensure    |  |  |  |
| answering the<br>question.                             | staff feel as though they are making |  |  |  |
| 440000   | the most out of their job.           |  |  |  |
|  |                                      |  |  |  |

A paragraph considering the drawbacks of the option not chosen. This is not evaluation as it simply lends support to the chosen option. On the other hand, Guida sainsburg's should not choose option 2. This is because retraining staff may not be hecessary and would be costly and time consuming. Also this block means that staff could able of the inserved of they are putting more effort in to improre customes service, but aren't getting paid as much as staff at & computitors such as much as staff at & computitors such

(9)

# **Commentary:**

This response is to Question 7d on Paper 2 and is based on the *Sainsbury's* case study. This candidate chooses Option 2 - 'increase wages - as the best method for the business to fund its expansion. They provide some simple contextualisation by using data from the case study by referring to a competitor of Sainsbury's, *Aldi*. From the initial point they provide some valid linked strands of development.

Note how the candidate then drifts from the question by considering the benefits to Sainsbury's of increasing wages, rather than the impact on motivation.

Another reason for using this exemplar is to show how the approach used in the second paragraph - explaining the drawbacks of the option not chosen - is not an example of Evaluation

Over the full response the candidate has generated 2 logical linked strands and as a result they secure Level 2 for A03a or 'Analysis'. Evaluation (AO3b) is not present and cannot access Level 1. Application is present but is limied and just gets into Level 1. Therefore, the candidate scores Level 1 for AO2, Level 2 for AO3a and 0 for AO3b which means a **final mark of Level 1 - 2 marks**.

# Justify – Paper 2 - Exemplar 5 (1BS02)

In order to raise the £1.2 million of extra finance needed, Mind Candy considered two options:

Option 1: retained profit

### Option 2: share capital.

|                                    | (c) Justify which <b>one</b> of these two options <i>Mind Candy</i> should choose. (9) |  |  |  |  |
|------------------------------------|--|--|--|--|--|
|                                    | I think option 2 is better for Mind  |  |  |  |  |
|                                    | Candy's cash low situation. This is the both option                                    |  |  |  |  |
|                                    | because they can gain money and quickly and  |  |  |  |  |
| Valid point,                       | easily this worth mon that they coold cause  |  |  |  |  |
| but weak<br>initial<br>development | because they do not have to do much  |  |  |  |  |
| point.                             | work, Also, they are presented to raile be   |  |  |  |  |
|                                    | money meaning that they can wrete there a  |  |  |  |  |
|                                    | 2 winess plan on the basis that they will raise this                                   |  |  |  |  |
| Not a valid point of               | money. This would lead to improved efficiency and higher                               |  |  |  |  |
| development                        | productivity. Moverer, a dissiduantiae is that whilst raising                          |  |  |  |  |
|                                    | the money they will have to give away a  |  |  |  |  |
| A simple                           | certain amount of their privings Pt This could bed hould                               |  |  |  |  |
| paragraph<br>considering<br>the    | Mean that the owners and make less projit and  |  |  |  |  |
| drawbacks of the chosen            | would be less influential in decision myting which could 3                             |  |  |  |  |
| option.                            | mean that the new shuichablers can'the content to change                               |  |  |  |  |
| L                                  | their new gime Petlandia. This could lead be   |  |  |  |  |
|                                    | 5 conflict within the business which could lead to a                                   |  |  |  |  |
|                                    | decrease in efficiency and therefore slover productivity.                              |  |  |  |  |
| Simple                             | In condision, I think option Z could be the<br>best as it garantees them to raise the  |  |  |  |  |
| conclusion                         |  |  |  |  |  |
|                                    |  |  |  |  |  |
|                                    | their shares at and how much of then they are willing                                  |  |  |  |  |
|                                    | to sell.   |  |  |  |  |

# **Commentary:**

This response is to Question 6c on Paper 2 and is based on the *Mind Candy* case study. This candidate chooses Option 2 - 'share capital' - as the best method raising finance.

The candidate offers some simple linked strands of development in constructing their response. There are - just - 5 strands, which are sufficient to reach Level 3 for Analysis (AO3a). Application is less strong. There is a simple reference to 'Petlandia', but overall application is 'limited' and therefore within Level 1. There is a simple conclusion, but this is a little formulaic and does not offer much new and original insight, despite the attempt at using an 'it depends' approach.

Therefore, the candidate scores Level 1 for AO2, Level 3 for AO3a and Level 1 AO3b, which means, using the best fit approach, a <u>final mark of Level 2 - 4 marks</u>.

## Justify – Paper 2 - Exemplar 6 (1BS02)

|                      | In order to raise the £1.2 million of extra finance needed, Mind Candy considered<br>two options: |                                   | the aims and objectives for the         |
|----------------------|---|-----------------------------------|---|
|                      | Option 1: retained profit   |                                   | gaming businers may change promo        |
|                      | Option 2: share capital.  | Conclusion                        | in conclusion, the gaming husines       |

### Commentary:

The first, and obvious, observation with this response is that it is very long. Excessively so, in fact, with some repetition that must have cost the candidate time later in the paper. Nonetheless, this is a good response with valid points based on the chosen option, and with effective balance and Evaluation.

Over the full response the candidate has generated 5 logical linked strands and as a result they secure Level 2 for A03a or 'Analysis'. Evaluation (AO3b) is also provided in the form of a final conclusion as well as in considering the drawbacks of the chosen option. Application is present but is a little formulaic, with simple references to 'gaming company', etc. However, this was just about strong enough for Level 3. Therefore, the candidate scores Level 3 for AO2, AO3a and AO3b which means a **final mark of Level 3 - 9 marks**.
