# 1:1 CHROMEBOOK INITIATIVE

The Chalfonts Community College

*Success is an Attitude!*

## ABOUT

The Chalfonts Community College is happy to announce that we offer our parents, students and guardians a 1:1 Chromebook Initiative.

We are committed to providing the best learning experience for our students and preparing them for the wider world outside of school. We strongly believe that this means providing students with access to technology.

We want to provide each and every student with their own 1:1 learning device which they can use at school and at home.

We know that for parents, making an investment in technology isn't always possible. If the technology is available at home, it may not be suitable to bring it into school, in case of issues with security and compatibility.

In order to provide seamless access to technology for the best price, we have partnered with edde Limited to manage our 1:1 Chromebook initiative.

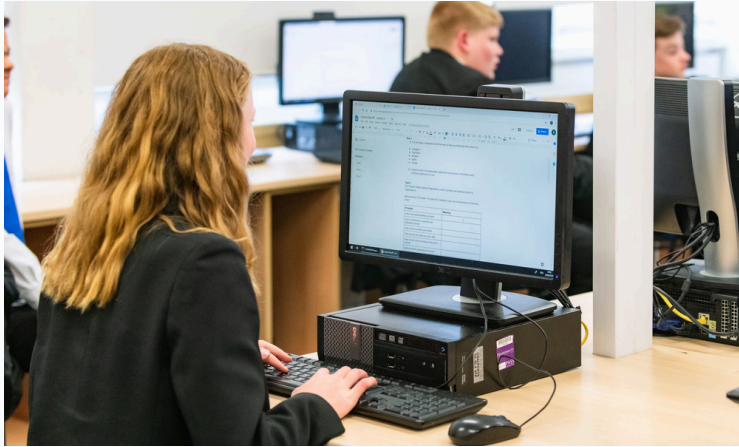

Some information will follow from edde education Limited with information on how to purchase your 1:1 device outright or over a fixed-term.

# 1:1 CHROMEBOOK SCHEME

The Chalfonts Community College

Success is an Attitude!

## A GOOGLE SCHOOL IN THE MAKING

At The Chalfonts Community College, we are embarking on our journey to become a Google recognised institution starting in 2024/25.

We aim to embed pedagogical evidence-based strategies that not only enhance our EdTech offering but also grow the skills and knowledge of all the students and staff that attend our school.

A key resource to help make this drive a reality is our 1:1 Chromebook Initiative. Starting in 2024/25 as a staff we will be looking to not only use Digital Technologies and pedagogically sound learning strategies more frequently in the classroom but aim to ensure that all students that attend our school are taught the skills that they will need to enter the modern workforce.

Whether that might be entering a career in programming and development, office administration, entrepreneurship, or trade. We know that no matter what job market you enter, you will be expected to interact with technology for work on some level and we want to ensure that our students have the best start.

Our goal is not to replace all the amazing things we already do in our classrooms with a 1:1 Chromebook device. Rather, our goal is to ensure that, where we can, we enhance and complement the learning that is already happening in class.

The use of these 1:1 Chromebook devices provides our students with the opportunities to:

- access their work outside of school,
- access tools that help them complete their homework and research or inquiry-based learning tasks,
- reduce their carbon footprint by lessening our paper dependency,
- access enrichment tasks more easily, which teachers can upload directly to Google Classroom,
- access school-provided learning-enhancing tools, such as Read&Write, Bibcitation, and an array of safeguarding extensions linked to their school Google Accounts.

Success is an Attitude!

## FUNDING

We have provided multiple options to our parents, carers and guardians in making the purchase of new 1:1 devices via the edde platform.

With edde, all the options available to purchase come with an HP Fortis G1m Chromebook (11/14" Screen) and a case. All fixed-term options also include insurance for the fixed-term period. You can purchase a Chromebook outright with an option to add-on insurance for 3 years.

We have opted this year to offer two models of Chromebooks for parents to choose from, should they wish to go with our edde 1:1 scheme. Both are the new HP Fortis G1m model, but differ in screen size and performance. We understand that some students prefer a device with a slightly bigger screen and look forward to taking subjects like Computer Science, Information Technology, Design & Technology, some of the GCSE/A-Level subjects which might require a device with a little more capability.

Our **Pupil Premium** or Free School Meals students and any students who receive funding through a recognised school-managed fund will receive a 50% subsidised option towards any device purchased via the edde education scheme using the **TCCP7-7** registration code.

Should any of our parents require any further assistance, we urge you to please refer to the following websites for further information on some options that might be available:
