

You've heard it from your teachers, you've heard it from your parents, now hear it from students... some things we'd like to have done differently if we were to do year 12 again...

These are...

The Top Ten Tips For Success in Year Twelve!!!

1. **Use your study periods** effectively = you will be under less pressure in the evenings.
2. If you don't understand anything, **ask your teachers!** Don't let problems you have with a course snowball.
3. **Start looking at university courses** this year, but don't panic!
4. Make sure you **stay in your teachers' good books** (punctuality, deadlines)
5. Do **wider reading** around your subjects.
6. Every so often have a **read through your old notes**. This helps to keep the information firmly within your memory, and it will prove invaluable when you start revising.
7. **Keep organised!** Make sure you have an efficient filing, so that you won't end up losing a folder that has a year's worth of notes in it, or a USB which has the only draft of your coursework on it...
8. Get involved in **extracurricular activities**: Young Enterprise, Sports Leaders and prefect roles will all look great on your personal statement!
9. **Don't let your job take over your life!**
10. Make sure you **have fun** - it's important to take a break from school life. Go out with friends / get a Saturday job – don't spend hours and hours on your homework!
